PROFESSIONAL SUMMARY

Computer Science undergraduate at NSBM Green University with hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in implementing JWT authentication, real-time communication with Socket.IO, RESTful API architecture, and responsive UI development. Published technical documentation on backend system design. Seeking a Software Engineer / Full Stack Developer Internship to contribute strong problem-solving and web development skills to a product engineering team.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Tailwind CSS, Framer Motion, DaisyUI, Vite, Zustand, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, Socket.IO, Middleware Architecture, bcrypt

Databases: MongoDB, Mongoose, SQL

Tools & Version Control: Git, GitHub, npm, Postman, VS Code

Cloud & Deployment: Vercel, Cloudinary

Other: Technical Writing

EDUCATION

BSc (Hons) in Computer Science — NSBM Green University, Sri Lanka *Expected Graduation: November 2027*

- GPA: 3.8/4.0 (Current)
- Relevant coursework: Data Structures & Algorithms, Database Systems, Web Development, Software Engineering, OOP Programming, Human-Computer Interaction, System Analysis and Design, Networking, Computer Architecture

G.C.E. Advanced Level — Physical Science Stream

- St. Anthony's Girls' College, Kandy

ACADEMIC PROJECT EXPERIENCE

Chatz — Real-Time Chat Application

Mar 2026 – Jun 2026

React, Node.js, Express, MongoDB, Socket.IO

- Engineered a full-stack real-time messaging application using the MERN stack, implementing Socket.IO for live messaging, JWT/bcrypt authentication with httpOnly cookies, and Cloudinary image uploads.
- Delivered a responsive interface with React, Vite, and Zustand for state management, styled with Tailwind CSS and DaisyUI, and deployed to production on Vercel.

BookSwap — Student Textbook Marketplace

Jan 2026

React, Tailwind CSS, Framer Motion

- Developed a responsive React marketplace enabling university students to buy, sell, and exchange textbooks at below-retail prices, with a multi-filter search system by category, price, and condition.
- Implemented smooth page transitions with Framer Motion, integrated Web3Forms for contact handling, and deployed on Vercel.

my-express-api — Backend REST API Template

Jun 2026

Node.js, Express.js

- Architected a production-ready, layered REST API template (routes, controllers, services, models) using native ES Modules, with centralized error-handling middleware to standardize API responses.
- Authored a technical deep dive on the API's architecture, published on [Hashnode](https://hashnode.com/@dushaniekanayake) to support other backend engineers adopting the template.

Farmer-Crop Management System (Group Project)

Sep 2025 – Nov 2025

Node.js, React Native, React.js, MySQL

- Developed a cross-platform system with a React Native mobile app and React.js admin dashboard, enabling crop management, order tracking, and real-time communication between farmers and buyers.
- Built and integrated RESTful APIs with JWT authentication and role-based access control (RBAC) using Node.js, Express.js, MySQL, and Sequelize ORM, supporting user, crop, product, and order management.

LEADERSHIP & VOLUNTEERING

- Co-Chief Organizer** — Association of Computer Science and Data Science, NSBM Green University (2024/25)
- Vice Chairperson & Program Team Lead** — Nexora 1.0 Inter-University Datathon, Association of Computer Science & Data Science (Jul 2025)
- Publicity Team Lead** — DataDive PowerBI Workshop & Figma Figma Workshop, Association of Computer Science & Data Science (Jan–Apr 2025)
- Participant, BrainWave Math Competition** — Mathematics and Statistics Circle, NSBM Green University (Jul 2024)
